

LUXURY WALL MOUNTED TOWEL WARMER

thermique™

by e(g)p

HOT GLASS TECHNOLOGY™

The award-winning Thermique™ Glass Towel Warmers combine beautiful transparent glass with precision controlled heating. This innovative technology offers remarkable, even heat that outperforms radiator type warmers. For those discriminating clients who appreciate luxurious, state-of-the-art products, imagine how Thermique™ hot glass will add a unique touch of class to your designs.

Engineered Glass Products is the exclusive developer of Thermique™ Hot Glass technology—winner of the prestigious **2005 KBIS Best New Product Award**, **Popular Science Best of What's New** and **The Chicago Athenaeum: Museum of Architecture & Design GOOD DESIGN™ Award**.
